# Testing, Track and Venue Hire

## Venue Hire

Rockingham's combination of flexible, modern facilities mean that it's the perfect place for that special event. No venue is more up-to-date than Rockingham.

All or part of the 350 acre site can be hired for track events, rallies or for club members to put their vehicles through their paces. We cater for every size of event, from full track hire to individual locations throughout the site.

Rockingham offers the use of three circuits simultaneously, as well as a 4x4 off road course, a gravel rally area and the UK's only wet grip and kick-plate facility. The site is overseen by 24-hour security and is sheltered from inquisitive photographers.

## Track Days

Rockingham is the UK's leading venue for both car and bike track events. Fast or slow corners, sportscar or motorcycle, one of our 13 international standard track configurations will do the job. Nowhere else in the country can combine the atmosphere of a stunning 52,000 seater stadium with such a wide mix of circuits.

Our world class support facilities include full international specification pit garages with an Indianapolis-style cold pit lane for refuelling, as well as a hot pit lane, a fuel station and a state-of-the-art, fully equipped medical centre. Safety, medical and marshalling cover is all included. Broadband wireless internet connections and full catering are available on request.

## Testing

Rockingham is the perfect venue for testing. Throughout the year general testing is available to approved licence holders driving race-prepared vehicles.

If you are competing at Rockingham there will be a number of testing days throughout the year, whether you need additional track time for set-up and preparation prior to your race meeting, or just need to shake down a vehicle.

Exclusive private test days are also available on request.

## The Circuits

International Circuit

National Circuit

International Super Sports Car Circuit
