

Can you handle it?

Learn the art of car control with the ultimate skidding experience on Rockingham's unique Ice zone.

You won't find any skid frames here - just your car and a range of unique super low-friction surfaces, giving you the most natural skid experience in a safe and controlled environment.

Special introductory offer - book before the 1st May for just £89.

Thrills and Skills

Rockingham's Ice Driving gives you the opportunity to explore the limits of your car and driving skills on our state-of-the-art Ice Zone.

Driving your own car, you'll experience the thrill of sideways driving and on-the-edge car control, all the time learning vital driving skills.

In the safe and controlled area of Rockingham's Ice Zone, we'll teach you how and why your car gets into a skid, how to hold, control and recover from a skid, as well as how to prevent getting into a skid in the first place.

Unlike traditional skid experiences which create artificial grip levels using skid frames, Ice Driving gives you a natural skid experience on our range of low grip surfaces.

You'll benefit from in-car tuition from one of our top instructors teaching you all of the skills you need through engaging, enjoyable teaching methods - and because if it's fun, you won't forget it.

About your experience

This is an opportunity to understand how your own car handles in a low risk environment here at Rockingham.

No specific clothing is required, just your usual clothes and footwear for driving.

Itinerary

Briefing

Ice driving session including in-car training
